

## Join us for a free breakfast seminar!

As we celebrate 20 years of wonderful projects, terrific clients, and fabulous employees, we invite you to join us for our Anniversary Client Seminar Series, exploring topics that look to the future.

## Getting Land Survey Results that Work: Putting together the elements for success

### 20<sup>th</sup> Anniversary Client Seminar Series

Did you ever specify survey services and not get the results you wanted? Are you not quite sure how GIS, digital mapping, or laser scanning services could fit into your project needs?

Join us for breakfast and an informative, interactive discussion to learn about the range of survey services you might need, such as topographic surveys, aerial mapping, utility surveys, property surveys, GIS, laser scanning - and how they can be combined to achieve successful results for your projects. Paul R. LeBaron, PLS, and Joyce Hussein, LEED AP O+M of Nitsch Engineering, along with Hugh Parke of Photogrammetric Technology, Inc., will give brief presentations and provide insight through case studies, on how to get results that work for your project. Presentations will be followed by a question and answer panel moderated by Judy Nitsch, PE, LEED AP BD+C.

### What You Will Learn

- Learn how to obtain the "right" survey services for your project
- Gain an understanding of aerial mapping and how to use it effectively
- Learn how survey fits in with BIM
- Learn the benefits of GIS and how it works with survey and CAD-based applications
- Gain an understanding of laser scanning and subsurface utility technologies and how they can benefit your project

### Who Should Attend

Architects, Landscape Architects, Engineers, Owners, and anyone who uses land surveying services in the course of their project work.

Please RSVP by March 31, 2010 to [mnee@nitscheng.com](mailto:mnee@nitscheng.com).  
**Early response is recommended as seating is limited.**

#### Date:

Tuesday, April 6, 2010

#### Location:

Hyatt Regency Hotel  
One Avenue de Lafayette  
Boston, MA

#### [Directions](#)
