20th Anniversary Client Seminar Series

As we celebrate 20 years of wonderful projects, terrific clients, and fabulous employees, we invite you to join us for our Anniversary Client Seminar Series, exploring topics that look to the future.

Stormwater Management: How Changing Regulations *WILL* Impact Your Projects

The new direction in US EPA stormwater regulations is changing building and site development requirements nationwide. This expanded design focus from *building* sustainability to *site* sustainability requires that stormwater be treated and managed as a resource, rather than piped off-site as quickly as possible. Federal, state, and local regulations are being updated to reflect this new approach and address environmental concerns regarding stormwater management. With the LEED credit system including building site and regional credits that relate directly to stormwater management, sustainable stormwater management design can contribute significantly to project LEED certification.

Join us for breakfast and an informative, interactive discussion with:

- Frederick Civian, Stormwater Coordinator, Massachusetts Department of Environmental Protection;
- Sandra A. Brock, PE, LEED AP BD+C, Chief Engineer, Nitsch Engineering; and
- Nicole Holmes, PE, LEED AP BD+C, Project Manager, Nitsch Engineering
- Gordon Reynolds, Assistant Director of Environmental Affairs, Harvard University.

This seminar will:

- Address proposed changes to the Massachusetts DEP's Stormwater Regulations;
- Explain how the new direction in EPA stormwater requirements will impact your projects;
- Share current Best Management Practices for sustainable stormwater management;
- Demonstrate how stormwater master planning can promote sustainability and address regulations;
- Share how new regulations will impact local urban academic campuses; and

Date:
Tuesday,
June 29, 2010

Location:
Hyatt Regency Hotel
One Avenue de Lafayette
Boston, MA
[Directions](#)

Program:
8:00 am - Continental Breakfast
8:30 am - Presentations
10:30 am - Conclusion

This program earns two AIA LUs
and two ASLA CES units.

Nitsch Engineering specializes in providing land surveying, civil engineering, transportation engineering, sustainable site consulting, planning, and GIS services. Founded in 1989, we have worked with a wide range of clients on major private development and public infrastructure projects in 17 states and five countries.
